

AlphaFlash® US Treasury Feed

Machine-readable US treasury auction data

AlphaFlash provides machine-readable announcements and results from US treasury auctions.

Algo traders, analysts, asset managers, hedge funds and risk managers operating in an automated, low latency trading environment can use the information to set algorithms to execute financial trading strategies. The information is made available in machine-readable format via multicast and TCP.

Key benefits

- Consistently faster and more economical than competitor products
- Designed for easy direct integration into trading algorithms
- Available in data centers across the globe

US Treasury Feed

The AlphaFlash US Treasury Feed contains information sourced from the New York Fed covering:

- Treasury Bills
- TIPS & Cash Management Bills
- Treasury Notes
- Treasury Bonds

Data packages

AlphaFlash subscribers can choose between several data packages:

- USA Feed
- European Feed
- Canadian Feed
- US Treasury Feed
- Chicago Business Barometer ('Chicago PMI')
- ISM Feed
- Fitch Ratings Feed
- Risk Signal Feed

Global connectivity options

Direct connectivity is available in data centers in Chicago, Secaucus (New Jersey), Washington DC, London and Frankfurt. AlphaFlash can also be accessed on CFN's Alpha Platform™ as well as TMX Atrium's network.

30-day free trial

AlphaFlash is available for a 30-day free trial.
